

Boluwatife Oladele

Full-Stack Developer & UI/UX Designer

Ibadan, Nigeria | +234 805 161 4609 | Techdevtea@gmail.com | deavteafolio.com | [LinkedIn](#) | [GitHub](#)

Summary

A passionate Full-Stack Developer and UI/UX Designer with a talent for transforming complex ideas into seamless, scalable, and responsive web experiences. With a foundation in development starting at age 16, I combine a deep understanding of clean code with a keen eye for intuitive design. I am proficient in building robust backend systems and pixel-perfect front-end interfaces, currently advancing my skills in the MERN stack to deliver comprehensive, high-quality web products.

Technical Skills

Category	Technologies
Frontend	HTML5, CSS3, JavaScript (ES6+), React, Webflow
Backend	PHP, Python, MySQL, Node.js (<i>Learning</i>)
Design & Tools	Figma, UI/UX Principles, Responsive Design, Git & GitHub, Performance Optimization

Professional Experience

Freelance Web Developer & UI/UX Designer | Remote

2023 – Present

- Architected and deployed full-stack web applications for clients, managing projects from initial concept in Figma to final implementation with custom code.
- Developed and optimized responsive, user-friendly interfaces using HTML, CSS, JavaScript, and React, resulting in improved user engagement and accessibility.
- Engineered secure backend authentication systems and database schemas using PHP and MySQL, ensuring data integrity and user privacy.

YouTube Channel Manager | Congress Alliance

2024 – Present

- Applied UI/UX principles to design engaging video thumbnails and content layouts, contributing to increased audience viewership and channel growth.
- Analyzed performance metrics to refine content strategy and enhance visual presentation for maximum impact.

Projects

Investment Platform | *Tech: HTML, CSS, JavaScript, API* | [Live Demo](#) | [GitHub](#)

- Developed a modern, responsive frontend for an investment platform featuring secure and transparent financial tools.

Private Chef E-commerce Site | *Tech: HTML, CSS, JavaScript, PHP* | [Live Demo](#) | [GitHub](#)

- Built a full-stack e-commerce platform for booking private chefs, complete with user account management, secure login/registration, and session handling.

Rook - Student Collaboration App | *Tech: Wapego (Legacy Platform)* | 2016 – 2017

- Co-developed a foundational web application for student communication and file sharing, sparking an early interest in building user-centric digital products.

Education & Certifications

Full-Stack Development (In Progress) | SQI College of ICT, Ibadan

Expected 2025

- Comprehensive training in software engineering, focusing on advanced backend and frontend technologies including the MERN stack.

Frontend Development | Verstronet IT Solution

2024

- Completed an intensive program covering modern frontend frameworks, data structures, and software engineering best practices.

BSc, Animal and Environmental Biology | Federal University Oye Ekiti

2023

- Honed strong analytical, research, and problem-solving skills, now applied to deconstruct complex technical challenges and design effective solutions.
